

2024 GB3 Championship

Race Director's note – Silverstone 27/28 April 2024

Clarification – Track Limits

Following discussion with the Stewards, the rules regarding track limits are confirmed to be as initially communicated at the Drivers' Briefing, and as per the briefing notes issued.

For the avoidance of doubt, the green and white kerb areas are **NOT** considered part of the track and abuse of these areas will be considered an infringement of the track limits. This is considered critically important for both consistency of enforcement, and also driver safety with respect to the forecast weather conditions for the event. Solid green areas are also outside of the track limits.

Example images are shown below, the red line demarcates the track limit (note the red line is not physically present on the circuit).
